

Cutting Bed Wood Boards in MAR-K's™ Wood Room. MAR-K™ wood boards are grooved and cut to size.

KILN DRIED WOOD Our wood is kiln dried (NOT pressure treated). This is a process of heating the boards to reduce the amount of moisture to less than 10% for OAK and less than 25% for PINE. Kiln drying helps prevent the boards from cracking and warping after installation. If a board looks slightly warped, try bolting it down to straighten it out.

CUSTOM WOOD - If you have a flat bed truck, steel bed floor or any vehicle that did not originally have a wood floor, then we can make a custom wood bed according to your specifications. Let **MAR-K™** help you make the wood floor to fit your measurements. We stock oak boards for a maximum finished length of about 110 inches. Keep in mind how many boards and metal strips you need for your application and provide the measurements indicated on our bed wood data sheet on page 72. We must know the dimensions of your bed area and the sizes of the boards to accurately design your specific application. Just fill out the bed wood data sheet and fax, email, or mail it to us for a prompt response.

MAR-K™ bed-to-frame holes are offset and countersunk for GM trucks. This makes the offset washer flush with the wood surface and prevents rotating and movement of the fastener just like the original pattern.

BED WOOD BOARDS -

- Wood is available in red oak (show quality) or yellow pine (daily driver use), and other varieties. These are hard, durable, woods, with a thickness of 3/4".
- Made in Oklahoma City, USA.
- **MAR-K™** grooves and cuts the boards to size.
- Our experienced wood cutters follow strict guidelines for selecting, checking, sorting, and machining the boards to manufacture an excellent product.
- Bed-to-frame mounting holes can be drilled using either the hidden bolt system or the standard countersunk holes as original.
- You can be assured that when you install **MAR-K™** bed wood, it will fit like a glove.
- You should finish your wood as soon as possible after you receive it in order to achieve the best results.
- Heat shields are highly recommended to protect the wood floor from high exhaust temperatures.
- **FINISH YOUR WOOD WITH MAR-K™ - FINISH IT™ is a wood finish product to make your bed shine! See page 19 for product information and instructions.**

EXHAUST HEAT SHIELD

This sheet metal shield protects your bed wood from heat of the exhaust system. It is mounted to the bottom side of the wood directly over the tailpipe where it goes over the rear axle. Includes mounting holes and stainless screws for attaching to the bed wood. Be sure to order two (2) heat shields if your truck is equipped with dual exhaust. Available in electrogalvanized steel or bright stainless.

STAINLESS STEEL SHIELD WITH STAINLESS SCREWS
