**BATTERY TRAYS  
& ASSEMBLIES**

**POLISHED  
STAINLESS  
STEEL  
BATTERY  
ACCESSORIES**

55 2nd - 57  
shown here

The **47-55 1ST GM** battery had a tray and a hold down. These parts are sold individually by **MAR-K**. It originally bolted under the passenger floor of the cab. There is a panel in the cab floor to access the battery. The side supports are built into the frame. All factory bends and holes have been

included in this excellent reproduction of the original. Both available in powder coated black only.

### WHY POWDER COATING?

Powder coating is a process of coating metal parts with a very durable finish which is tougher and more resistant to corrosion than conventional paints. The process involves applying a powder then baking it at a high temperature, about 400 degrees. The high temperature causes the powder to form a hard glossy finish that is resistant to abrasion and many chemicals. **MAR-K** battery tray products are finished with a black powder coating to provide a long lasting and highly decorative finish.

### GM BATTERY TRAYS AND HOLD DOWNS

- Battery trays are available for 47-72 GM trucks.
- **MAR-K** battery trays are made in Oklahoma City, USA, with all original lines and holes.
- The stainless steel and powder coated battery trays are excellent reproductions.
- They include holes for mounting, as well as a center drain hole.
- **MAR-K** also makes the battery hold down.
- Hold downs and hardware kits may be purchased separately.

The **55 2ND-59 GM** battery tray assemblies are sold in polished stainless steel or powder coated black. Notice the detail of the lines and the bends of the assemblies. These bolt to the fire wall through predrilled holes. Drain holes are also drilled in the tray. Battery hold downs and hardware are sold separately.

The **67-72 GM** assembly is sold with or without the a/c hose bracket welded onto the assembly. The a/c hose clamp and bolt are sold separately. These assemblies are excellent reproductions of the original. Installed in front of the motor on

the passenger side, this will be a great addition under your hood. All bends and holes are made as original. Available in polished stainless or powder coated black finish.
