

MAR-K

**BED WOOD
OAK/PINE**

Cutting Bed Wood Boards in MAR-K's Wood Room. MAR-K grooves and cuts the boards to size.

KILN DRIED WOOD Our wood is kiln dried (NOT pressure treated). This is a process of heating the boards to reduce the amount of moisture to less than ten percent for OAK and less than 25% for PINE. Kiln drying helps prevent the boards from cracking and warping after installation. If a board looks slightly warped, try bolting it down to straighten it out.

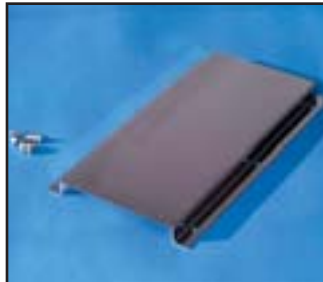

CUSTOM WOOD - If you have a flat bed truck, steel bed floor or any vehicle that did not originally have a wood floor, then we can make a custom wood bed according to your specifications. Let **MAR-K** help you make the wood floor to fit *your* measurements. We stock oak boards for a maximum finished length of about 110 inches. Keep in mind how many boards and metal strips you need for your application and provide the measurements indicated on our bed wood data sheet on page 60. We must know the dimensions of your bed area and the sizes of the boards to accurately design your specific application. Just fill out the bed wood data sheet and fax or mail it to us for a prompt response.

MAR-K bed-to-frame holes are offset and countersunk for GM trucks. This makes the offset washer flush with the wood surface and prevents rotating and movement of the fastener just like the original pattern.

BED WOOD BOARDS -

- Wood is available in red oak (show quality) or yellow pine (daily driver use). These are hard, durable, woods, with a thickness of 3/4".
- *Made in Oklahoma City, USA.*
- **MAR-K** grooves and cuts the boards to size.
- Our experienced wood cutters follow strict guidelines for selecting, checking, sorting, and machining the boards to manufacture an excellent product.
- Bed-to-frame mounting holes can be drilled using either the hidden bolt system or the standard counter-sunk holes as original.
- You can be assured that when you install **MAR-K** bed wood, it will fit like a glove.
- We recommend that you finish your wood as soon as possible after you receive it in order to achieve the best results.
- Heat shields are highly recommended to protect the wood floor from high exhaust temperatures. See below.

EXHAUST HEAT SHIELD

This sheet metal shield protects your bed wood from heat of the exhaust system. It is mounted to the bottom side of the wood directly over the tailpipe where it goes over the rear axle. Includes mounting holes and stainless screws for attaching to the bed wood. Be sure

to order two (2) heat shields if your truck is equipped with dual exhaust. Available in electrogalvanized steel or bright stainless.

STAINLESS STEEL SHIELD WITH STAINLESS SCREWS

- **POLICY** - We guarantee wood to be of proper fit.
- The wood is guaranteed for 14 days from ship date.
- For this reason you should wait to purchase wood until you are ready to install.
- **IMPORTANT INFORMATION ON WOOD:**
- OAK is FAS grade which means that the top face is free of defects. Oak is grooved, sanded, cut-to-size and ready to finish. It is considered show quality wood.
- PINE is grade "C" and its tolerances allow: firm knots max 3/8", some checking (splits), planing flaws on bottom of boards, bowed boards that flatten when installed, some natural discoloration and color variation are allowed. Pine is planed, cut-to-size and ready to sand and finish. It is considered better for daily driver use.

"I am sending you pictures of my truck and the bed. The kit I ordered from you was the Oak. It turned out beautiful! Thank you for your help when I ordered it. It was the first one I have ever done. Hope you can use my pictures to show people even amateurs can do this. Thanks again."

Rhonda Thomason, Datton, GA
1978 Dodge Warlock
