### PLEASE NOTE

All the tailgate handle relocator kits marked with an asterisk (\*) include a new handle with the kit. For those kits that do not include a handle, you must use the original handle.

## HANDLE RELOCATOR KIT-

- Reverse your tailgate latch to the inside of the bed with our handle relocator kit.
- **MAR-K** designs each kit to work and look the best for each individual truck.
- Handle relocator kits are available for many GM, Ford, and Dodge trucks.
- Some applications utilize the original latch handle, while others include a new handle and latch rods.
- Either way, your kit will come with all parts needed, installation hardware and complete instructions and templates.
- Some trucks already have a smooth tailgate, therefore a tailgate cover is unnecessary. For these models, an outside filler plate is included in the kit to fill in the space where the handle was located. This gives the tailgate a completely smooth look.
- *Made by MAR-K in Oklahoma City, USA!*
