## TAILLIGHT PARTS -

These are taillights and parts made to replace the original taillights.

Taillight assemblies include 6 volt or 12 volt bulbs, where noted. These lights are used as brake lights and turn signals but not as backup lights. Lenses and brackets sold separately. These are purchased from an outside vendor. For custom billet lights for flat panel areas, see page 75.

## FORD

### STEPSIDE TAILLIGHT PARTS

FORD 48-52 FLARESIDE

Ford 48-52 taillight assemblies are available with black housing and stainless bezels or stainless steel housing and bezels. Ford 53-56 shield-type taillight assemblies have black painted steel housings and red plastic lens. Both include mounting

hardware and 12 volt dual-filament bulbs. Driver side taillight assemblies have a clear lens at the base to light up the license plate area.
