

Louvres are punched in many of our MAR-K™ parts like rear pans and tailgate covers using this louvre press.

**FULL COVER -**

- The full tailgate cover is made of electro-galvanized steel and covers the entire outside portion of the tailgate.
- **MAR-K™** designed full covers to perfectly match the body lines of each specific truck. The full cover gives your truck a custom SMOOTH look.
- Tailgates with latch handles will need a handle relocator kit in order to open the tailgate from the inside of the bed.
- The full cover is available smooth, bowtie embossed, or with louvres. It is available for many GM, Ford and Dodge trucks.
- Made by **MAR-K™** in Oklahoma City, USA!

**WELD-IN PANEL -**

- This is a panel, also made of electro-galvanized steel, that is designed to cover the indented portion of the tailgate to give it a smooth look.
- **MAR-K™** offers the weld-in panel as an alternative to the full tailgate cover for some trucks.
- For some GM trucks, the weld-in panel may be ordered with a handle hole cut out to retain the use of the latch handle from the outside of the tailgate.
- A completely smooth weld-in panel may be used with a **MAR-K™** handle relocator kit to provide a smooth outer surface with access to the handle from the inside of the tailgate.

**TECH TIP:** Full tailgate covers and weld-in panels are installed by welding. Full covers curve up over the top of the tailgate and down under the bottom. The weld-in panels weld on to the tailgate beginning at the top of the indented area (usually the location of the handle). Some panels curve under the bottom of the tailgate, while others insert into the indentation only. This depends on the shape and location of the indentation on the tailgate.

**MAR-K™ HANDLE RELOCATOR KITS**

- Reverse your tailgate latch to the inside of the bed with our handle relocator kit.
- Some applications utilize the original latch handle, while others include a new handle and latch rods.
- Either way, your kit will come with all parts needed, installation hardware and complete instructions and templates.
- Some trucks already have a smooth tailgate, therefore a tailgate cover is unnecessary. For these models, an outside filler plate is included in the kit to fill in the space where the handle was located. This gives the tailgate a completely smooth look.
- Made by MAR-K™ in Oklahoma City, USA!
